Computer Science Undergraduate Seeking Internship/Freelance Opportunities

EDUCATION

• VNR Vignana Jyothi Institute of Engineering and Technology <i>B.Tech – Computer Science; CGPA: 9.58 (3rd year)</i>	Hyderabad, India 2024 – 2028
• Fiitjee Junior College <i>Intermediate: 98.1%; JEE Mains: 97.66 Percentile; TS EAMCET Rank: 2228</i>	Hyderabad, India 2022 – 2024
• St. Andrews High School <i>Secondary Education; Percentage: 96.8</i>	Hyderabad, India 2010 – 2022

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, C++
- **Web Development:** Next.js, React, Node.js, Express, FastAPI
- **Databases:** PostgreSQL (Prisma ORM), MongoDB
- **AI Tools & Frameworks:** Claude Code, Google AI Studio, n8n (agentic workflows), FAISS, Sentence Transformers
- **Engineering Practices:** Git (branching, pull requests, code reviews), REST APIs, SDLC, Database Design

PROJECTS

- **Vishuddhi – Female Stress & Cognitive Wellness Platform:** AI-powered wellness app monitoring stress in women aged 16–29 via a **Random Forest classifier** trained on **800+ samples**, categorizing users into **4 stress levels** across **12 metrics** at **86% accuracy**; integrated menstrual cycle tracking and a cognitive module inspired by the **Pink Elephant Theory-Scientist Daniel Wegner** to model intrusive thought patterns. [View on GitHub](#) — [Prediction Repository](#)
- **Question Auditing System (SBERT):** Built a **semantic question analysis system** using **FastAPI**, **MongoDB**, **Sentence Transformers (MiniLM)**, and **FAISS** to detect duplicate and semantically similar examination questions. Designed a **hybrid vector-search architecture** with embedding persistence, vector indexing, similarity-based classification, and report generation. [View on GitHub](#)
- **Email Auto-Reply Workflow using n8n:** Built an automated email reply system in **n8n** where incoming Gmail messages trigger a workflow that generates responses through the **Google Gemini LLM**. [View on GitHub](#)
- **Controlled Document Approval System:** Built a role-based document lifecycle platform (Author → Reviewer → Admin) with a **Next.js App Router** frontend, **TypeScript** service layer, and **PostgreSQL via Prisma ORM**. **PostgreSQL triggers** make the audit log append-only by rejecting any **UPDATE** or **DELETE** on **AuditEvent** at the database level, preserving history even against direct SQL access. A **check constraint** ensures rejected events always carry a comment; **cascading and restrict constraints** prevent silent data loss across document, owner, and audit relationships. Implemented **optimistic concurrency** via **expectedVersion**; concurrent edits surface as a **ConflictError** rather than silent overwrites. [View on GitHub](#)

ACHIEVEMENTS

- **Solution Sprint ISTE 2025:** Secured **4th place** for *Matrisha*, a Figma-designed maternal emergency response platform using autorickshaw ambulances and bikes for faster access in congested and rural areas. [Prototype](#)
- **GirlScript Summer of Code (GSSoC) 2026:** Shortlisted as a contributor for the open-source program.
- **Hack Your Path 7.0 – HITAM:** Top 10 of 400+ teams at a 24-hour national-level hackathon.
- **Tech Tournament – ACM Convergence, VNRVJIET:** 2nd place among 200+ participants in a competitive DSA tournament.

CERTIFICATIONS

- **Prompt-to-Prototype – Google Startup School (Dec 2025):** Hands-on certification using **Google AI Studio** and **Gemini models**.
- **Applied Artificial Intelligence – IBM SkillsBuild (Jan 2026):** Completed foundational and applied AI modules on the IBM SkillsBuild platform.
- **Google Cloud Study Jam (Oct 2025):** Hands-on training on **GCP**: container deployment and data engineering; earned Google-hosted skill badges.

EXTRA-CURRICULAR ACTIVITIES

- **Web Development Volunteer (GDGC):** Google Developer Groups on Campus
- **Web Development, Action Committee – Turing Hut:** Competitive Programming Student Chapter
- **Carnatic Vocal Music Practitioner:** Pracheen Kala Kendra
